The following is an examiner's statement of reasons for allowance: The claimed invention is deemed allowable over the prior art of record or any combination thereof. The prior art of record does not teach compounds having the structures recited in instant claims 1 and 4, and therefore also does not teach or suggest compositions containing the same or methods of using the same. The prior art of record also does not teach or suggest reacting a core antibiotic or core cyclic peptide with the reagents recited in instant claims 37, 41, or 42. See also the Office action mailed February 28, 2003, section 15. The prior art rejection over the WO Patent Application 98/00173 set forth in the Office action mailed November 12, 2003 is withdrawn because, as argued by Applicants, the actinomycin taught by the reference is not a core antibiotic or a core cyclic peptide as the terms are defined in Applicants' specification, and therefore the modified actinomycin of the WO Patent Application '173 is not embraced by Applicants' claims. Note also that the polymyxin of Bouchaudon et al (U.S. Patent No. 3,817,973) is not an acidic lipopeptide antibiotic.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
